

Colorado Brewing Systems

CUSTOM KETTLE TEMPLATE

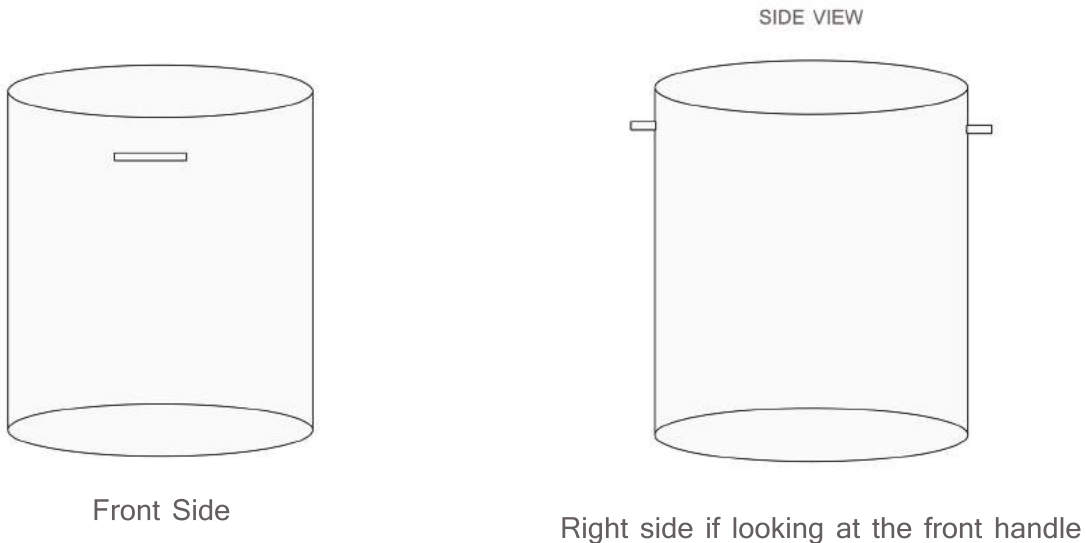

In order to ensure that we place your fittings in the correct spot, please indicate your desired locations with as much detail as possible. Include distance from the top or bottom to CENTER OF THE HOLE. For fittings that you would like to leave in their standard location you can simply leave that blank and we will assume it will be put in our standard location. If you are not sure what distance to put the fitting at, just indicate a general location and we will put it at the best height. Cheers!
